

Add Israel as a friend?

You are about to add Israel as a friend. This will bring you economic benefits, access to a world leader in humanitarian aid and align you with the undisputed leader in human rights in the Middle East. (You may also receive a significant chunk of land for this agreement).

[ if that's not enough]

Also, if you add Israel as a friend, Israel has been known to provide water, medical aid, intelligence and tourism as long as the friendship is in effect. Oh, and Israel just discovered a ton of natural gas and can begin exporting within five years.

Think about it.
